

"Deep Fakes, Generated and Manipulated Media:
It is real and coming for our society!"

Edward J. Delp
Video and Image Processing Laboratory
School of Electrical and Computer Engineering
West Lafayette, Indiana

In this talk I will present an overview of the current state of generated and manipulated media, such as Deep Fakes, and describe how these methods work, where they are being used and how to detect them.

I will also describe the history of manipulated media content and how we got where we are today an outline of my talk is:

Historical Overview of Manipulated Media

The disappearing Russians

Hollywood and CGI

Cheapfakes and Deepfakes

Seeing is not believing

An overview of the technology

The threat of manipulated media

Where is this all going in 5, 10, 20 years?

Is help coming?
